

Class 4

Part - Basic Electronics

Chapter - 2 LED Glowing

Pre-requisites

1. Understanding of working of LED and its usages
2. Sound knowledge of operating voltage of different electrical components
3. One should be familiar with how the rails are attached to the breadboard's holes.
4. The impact of the resistor on the electrical circuit.
5. Operation of batteries
6. Before beginning this chapter, one needs see this video
